Propane Tank Safety

Extraordinary snowfall in the mountains of Idaho can create deep snow that can damage propane pipes and tanks. When clearing your roof, pushing heavy snow onto a propane tank can damage the pipes and fittings, causing gas leaks.

The U.S. Consumer Product Safety Commission (CPSC) and the National Propane Gas Association (NPGA) suggest the following safety tips for proper care of propane tanks in severe snow areas.

Use a broom instead of a shovel when clearing snow off the tank or around the exposed piping, regulator, gauges, or tubing.

When clearing the roof, avoid shoveling snow onto exposed piping around the propane regulator near the building or onto the propane tank and piping, as well as any meters or other piping that may be in use.

Check regulator vents on the propane system to be sure they are free of snow, ice or water that could freeze. (A two-stage system has a regulator on the tank and at the entrance of the propane piping to the building; a single regulator is on the tank.) If a regulator vent is clogged with ice or snow, contact your propane supplier immediately.

WINTER PARKING, SNOW and SLUSH REMOVAL

ROADS - Parking

The City of Cascade would like to remind you to keep the streets clear for snow removal operations.

Cascade City Code (7-2-2)

limits parking of motor vehicles on any street or alley within the City for a period of no longer than two 2 hrs.

SNOW / SLUSH -and MUD REMOVAL

Cascade City Code (5-7-1)

It is the responsibility of the Owners/Occupants of businesses fronting Main St. to remove snow, slush and mud from the sidewalks within 24 hours of occurrence.

Snow and Bermed Driveways

On 2/12/2016 this topic was discussed at a City Council Meeting and it was determined that to plow every driveway would not be feasible due to limited staff, budget constraints and fairness to tax payers.

**Be a Snow Angel.
Help out when you can.**
