and complete the survey.

Monthly Water Testing Results

Public utilities are required by law to take many expensive samples each month. They also must pay the employees that run them, as well as cover administrative costs.

The City of Cascade tests drinking water based on requirements specific to our permit. The testing locations are dictated by Idaho DEQ based on our water distribution system. Water testing occurs in areas with close proximity to our gravity fed tanks and end of the line locations.

Collection Date and Collection Times:

07/15/25 at 6:21 am, 7:22 am

Results:

In compliance.
No exceedances.

If you can wear the hard times of your life as furrows on your brow, you can wear the good times as a twinkle in your eye.

Robert Brault

XERISCAPING FOR MOUNTAIN CLIMATES

Xeriscaping is a type of landscaping that **reduces the use of water by using low-water plants** and design techniques. The term xeriscape comes from the Greek word “xeri” which means dry. This type of landscaping is ideal for mountain climates because they often have limited rainfall and dry summers.
