Precious and limited, use it with care.

Utility rates are reviewed annually and based on the actual costs to operate the public water and waste water systems. The proposed rate changes for FY 26/27 budget were approved by City Council after the public hearing on 8/10/26. The in depth water usage study was conducted during the same time and has recently been completed. Based on the study results, the approved budgeted rates have been modified to meet the needs of both DW and WW systems.As the increased rates did not exceed 5%, an additional public hearing was not required.
